2 Completing your international Air Waybill

An international Air Waybill is required for each shipment to ensure that it is delivered quickly and safely. One international Air Waybill is required for each destination address, irrespective of how many packages the shipment contains. Your international Air Waybill does not replace a Commercial Invoice.

Online international Air Waybill: available on fedex.com/ie, click on 'Prepare a Shipment Online' on the roll-over navigation menu under 'Ship'.

Registration: Go to fedex.com/ie, click on Ship and choose a user ID and password. Enter your personal details in the 'Contact Information' section. You will then receive confirmation by email of your registered user ID.

Information required on your international Air Waybill:

1 Entering recipient information

The first step in processing a shipment is to enter information about the recipient of your package. If you select a recipient from your Address Book the recipient's details will be automatically completed by the system. You can store up to 2,000 recipients in your Address Book.

2 Specifying package details

Select the **type of service and the packaging** you want to use. Select the number of packages in the current shipment. You can process up to 25 packages in a single shipment.

Enter the **weight and value** of each package separately.

If you're shipping documents set the declared value of shipment to zero.

Indicate whether your shipment contains **documents, or products and commodities**.

Enter a **description of the contents** of your shipment.

3 Specifying billing details

From the drop-down list, select the party that will be paying the shipping cost and the duties, taxes and fees.

If you choose to bill the recipient or third party, you also need to enter their account number. Please note however that some countries do not allow you to bill the recipient or a third party, please check with Customer Service if you wish to choose one of these options.

You can also enter **your reference** information in the designated text box.

4 ShipAlert

You can choose to receive alerts via email when a shipment has been shipped, delivered or when there has been a critical event that affects delivery. Enter the email addresses of everyone you wish to receive notifications from ShipAlert.

When you have entered all details for your shipment, FedEx Ship Manager® at fedex.com will generate an international Air Waybill which you can print onto plain paper.

Online shipping with FedEx – it's easy

- Save time and reduce the risk of error in completing your international Air Waybill.
- Store shipping information (address, recipient, description of goods) to retrieve and use again for future shipments.
- Get a courtesy rate quote or schedule a pick-up.

3 Completing your Commercial Invoice

Customs authorities require an invoice for *all* international shipments. This means a Commercial Invoice if the goods are intended for resale, or a *pro forma* invoice if they are not. If you complete your international Air Waybill online, this will also automatically generate a Commercial Invoice.

Information required on your Commercial Invoice:

- A Commercial Invoice is not required for commodities shipped within the European Union (EU). It is mandatory for all shipments to countries outside the EU, except for documents that weigh less than 10kg.
- Entering accurate and detailed information on the Commercial Invoice is a major factor in guaranteeing swift customs clearance.
- You should enclose one original plus two copies of the invoice, each with an original signature.

- 1 Name, address and VAT number of shipper/exporter.
- 2 Name, address (including postcode and phone number) of recipient.
- 3 Country of manufacture
 - If the goods were made in more than one country, each country of origin must be stated next to each corresponding product.
 - The country of origin is the country in which the goods were produced – not the country from which they are exported.
- 4 Give a complete description of the item(s). Generic descriptions are insufficient. You need to indicate:
 - What it is
 - What it is made of
 - How many/how much
 - How it will be used

For example: "10 boxes of stainless steel screws for civil aircraft," rather than "civil aircraft parts."

Quantities. Show individual and column totals for the number of packages, quantity, unit of measurement, weight, unit value and total value.
- 5 Specify the currency. Remember, several countries use the dollar sign (\$), so it is important to specify the unique three-letter code for each currency, e.g. USD, CAD. The sign "\$" is insufficient. You can find the appropriate currency code on the website: www.iso.org and click on 'Customer Services' section.

Online shipping with FedEx – it's easy

Complete your Commercial Invoice quicker online

- Remove the need to complete paperwork manually by creating a Commercial Invoice automatically when you ship online using FedEx Ship Manager® at fedex.com.

Online help with all aspects of customs documentation

- Our online tool, FedEx® Global Trade Manager on fedex.com/ie (click on 'Customs Tools'), can indicate whether or not you require a Commercial Invoice and highlight any additional customs clearance forms that would be required to accompany your shipment.
- FedEx® Global Trade Manager also gives detailed commodity and country information, information on relevant customs regulations, a currency converter and can even estimate **shipping duties and taxes** that would be due on your shipment.

Eight packing tips for trouble-free carriage

To ensure that your shipments arrive on time and in good condition, it is important to take time in packing and labelling them correctly.

- Protect printed material in plastic covers.
- Use padded packs for small parts.
- Pack fragile items individually to prevent impact.
- Protect any sharp edges using bubble-wrap or corrugated card or foam.
- Seal packages using tough adhesive sheet or tape. Never tie packages with string, which can get tangled up in sorting machines.
- Remove all previous address details and other old labels from the packaging.
- Heavy or bulky freight shipments must be stacked on a pallet, skid or similar, that can be easily fork-lifted. Pack any heavy objects carefully to avoid them moving around inside the package. Distribute weight evenly. Stack boxes on a pallet squarely corner-to-corner. Keep the top level of the pallet flat, to minimise risk of loss or damage to cartons, and cover at least the top layer to give better protection.
- FedEx carries products that are defined as dangerous by IATA. These include items such as explosives, flammable gas and liquids, corrosive materials, but also items such as paintings, cosmetics and alcohol (above certain volumes). International regulations are strict and shipping calls for meticulous verification by international specialists in shipping dangerous goods. For more information please call Customer Service on 1800 535 800.
