# How to Determine Your International Export Rates

FedEx® International Deferred Freight offers economical rates for select international routes with deferred timelines.

Our rates are based on the total weight of all packages shipped on a single international air waybill.

To determine the door-to-door rate for your international export shipment, follow these simple steps:

**Step 1:** Locate your destination state or country/territory and the corresponding zone on page 4. Please note that FedEx International Deferred Freight is only available to select destinations.

**Step 2:** Determine your shipment weight and find the rate in the appropriate zone on the corresponding Rate Chart (see page 5).

**Step 3:** Add special handling fees, surcharges, and other additional charges (if applicable). Refer to pages 103-110 in the 'Additional Fees/Surcharges and Information' section of the [FedEx Express Rate Guide](#) for a list of these fees and charges in respect of international freight services and refer to the note below for information about dimensional weight calculations applicable to FedEx International Deferred Freight service.

## Please Note:

Dimensional weight for FedEx International Deferred Freight service is calculated by multiplying the length by width by height of each package in inches and dividing by 166 cubic inches per pound (if multiplied in centimetres, divide by 6,000 cubic centimetres per kilogram). If the dimensional weight exceeds the actual weight, charges may be assessed based on the dimensional weight. FedEx reserves the right to modify or amend the Dimensional Weight standard without notice.

# International Import Services and Rates

# How to Determine Your Import International Rates

FedEx® International Deferred Freight offers economical rates for select international routes with deferred timelines.

Our rates are based on the total weight of all packages shipped on a single international air waybill.

To determine the door-to-door rate for your international import shipment, follow these simple steps:

**Step 1:** Locate your origin state or country/territory and the corresponding zone on pages 8 and 9. Please note that FedEx International Deferred Freight is only available from select origins.

**Step 2:** Determine your shipment weight and find the rate in the appropriate zone on the corresponding Rate Chart (see page 10).

**Step 3:** Add special handling fees, surcharges, and other additional charges (if applicable). Refer to pages 103-110 in the 'Additional Fees/Surcharges and Information' section of the [FedEx Express Rate Guide](#) for a list of these fees and charges in respect of international freight services and refer to the note below for information about dimensional weight calculations applicable to FedEx International Deferred Freight service.

## Please Note:

Dimensional weight for FedEx International Deferred Freight service is calculated by multiplying the length by width by height of each package in inches and dividing by 166 cubic inches per pound (if multiplied in centimetres, divide by 6,000 cubic centimetres per kilogram). If the dimensional weight exceeds the actual weight, charges may be assessed based on the dimensional weight. FedEx reserves the right to modify or amend the Dimensional Weight standard without notice.
