FedEx®

Solution Overview

We build software that saves your organization time and money on shipping, receiving, and invoice processing.

Our solutions are hosted and billed on a per package basis (SaaS), meaning you only pay for what you use, and generating an immediate ROI through lower shipping fees, labor costs, and faster cost allocation throughout the shipping and carrier invoice processing cycle. Add in our integrated inbound package and pouch tracking system, PS|Receiver, for full chain of custody and reporting on the inbound side, and you've just automated your entire shipping process.
